

PAINTE OSWEGO COLOR PALETTE BOOK

Forward

Painting one's home in a historic color scheme can often be intimidating. Choosing how colors work together can be difficult to do. This is why so often homeowners default to a simple white color scheme. It is safe, if not particularly inspirational.

This booklet takes the guesswork out -- by employing historic color schemes developed by professionals. *Paint Oswego* provides Oswegonians with an opportunity to complement their historic homes by choosing from among the rich history of house colors that existed in 19th and early 20th centuries in Oswego, NY. Importantly, these colors *work together*. The coordinated paint schemes developed by Historic House Colors are freely available in this booklet, providing ready, at-hand options. Custom color assistance is available if desired at <http://historichousecolors.com/oswego-new-york-extra-services/>

Historic House Colors (HHC) of Ann Arbor, MI, professionally created a base set of 50 historically correct period color schemes for the City of Oswego, NY. And since each scheme has one optional (bonus) color that can be swapped for any color in the 3-color base set, or added as a 4th color, there are 250 possible combinations. Separated into four historic periods from 1800-1940, homeowners can simply choose from the preset schemes or work with HHC to develop individual house specific colors and color placement.

Each color has a name, and a listed 4-digit code, that is a Sherwin Williams color drawn from their complete range of currently available paints at the local Sherwin Williams store. If one prefers, most all local paint stores in Oswego can also color-match the color schemes.

Arts & Crafts (1900-1940).....	44

Where the Colors Go

defining, body, trim and accent locations

Body: Siding of the house (clapboard, shingles, aluminum or other siding)

Trim: Wood or other material surrounding windows, doors, vertical corner board on the corners of the house, horizontal boards around the base of the house, eaves below the roof, porch railing and posts, and other features

Accents: brackets under the eaves of the house, shutters, window sash frames, selected areas on porch posts or spindles, unusual architectural features of a house

Bonus Colors: gables, secondary body siding (such as a change in the siding materials from the first to second floor, dormers, porch posts, or as an alternative color for body, trim or accent
